

# James Connor Volpe

Full-stack Software Engineer

## EXPERIENCE

### Lowes - Software Engineer | Charlotte, NC

March 2025 - Present

- Lead the adoption of a micro frontend architecture for the Lowes Returns Android app to improve scalability and developer velocity.
- Implementing new UXs in React, Ionic, and Capacitor for Lowes Returns Android app used by sales floor associates.

### Freelance - Full-stack Web Developer | Remote

Jan 2023 - Feb 2025

- Led end-to-end delivery of web apps for individuals, startups and SMBs. From scoping and estimates to architecture, implementation, testing and deployment. Utilizing platforms like UpWork to find clients.
- Built fullstack apps in NextJS and deployed to AWS with custom CDKs
- Built backend services in Node.js or Go, exposing REST APIs.
- Implemented CI/CD with Github actions

### Amazon Web Services - Front End Engineer | Seattle, WA

July 2021 - Jan 2023

- Led implementation and launch of new React user experiences on the AWS Identity and Access Management Console, impacting thousands of customers. Monitored and quickly remediated incoming customer issues.
- Participated in on-call rotation every month for the IAM console, resolving customer and operational issues and presenting the weekly status to the broader Identity team.
- Wrote extensive unit and integration tests with React Testing Library, Enzyme, and Cypress
- Was not affected by layoffs and left this position at will to relocate closer to family in Chicago, IL.

### Workiva - Software Engineer Intern | Ames, IA

May 2020 - August 2020

- Front-end development on Dart + React based web application, Wdesk.
- Developed an improved modal to manage XBRL profiles in Wdesk.
- Worked with Agile development methodologies. Participated in code review and wrote unit and functional tests.

### NPR - Web Software Developer Intern | Washington, D.C.

May 2019 - August 2019

- Utilized a full stack (MongoDB, Express.js, Angular, Node.js) to develop an Audio Engineering discrepancy logger web application. I was the sole developer on this project.
- Used Docker to containerize the application for CI/CD.
- Gained experience with project management tools such as Jira.
