### **James Volpe**

Software Engineer

#### **EXPERIENCE**

#### Amazon Web Services, Seattle, WA — Front End Engineer

July 2021 - Jan 2023

- Lead implementation and launch of new React user experiences on the AWS Identity and Access Management Console, impacting thousands of customers. Monitored and quickly remediated incoming customer issues.
- Participated in on-call rotation every month for the IAM console, resolving customer and operational issues and presenting the weekly status to the broader Identity team.
- Wrote extensive unit and integration tests with React Testing Library, Enzyme, and Cypress
- Was not affected by layoffs and left this position at will to relocate closer to family in Chicago, IL.

#### Workiva, Ames, IA — Software Engineer Intern

May 2020 - August 2020

- Front-end development on Dart + React based web application, Wdesk.
- Developed an improved modal to manage XBRL profiles in Wdesk.
- Worked with Agile development methodologies. Participated in code review and wrote unit and functional tests.

#### NPR, Washington, D.C. — Web Software Developer Intern

May 2019 - August 2019

- Utilized a full stack (MongoDB, Express.js, Angular, Node.js) to develop an Audio Engineering discrepancy logger web application. I was the sole developer on this project.
- Used Docker to containerize the application for CI/CD.
- Gained experience with project management tools such as Jira.

#### **EDUCATION**

# Iowa State University, Ames, Iowa — Software Engineering, B.S.

August 2017 - May 2021

· 3.01 GPA

#### **PROJECTS**

(See <a href="https://jcvolpe.me/projects">https://jcvolpe.me/projects</a> for more)
